Chairman of Congress Opposes Settling of European Debts

(By United Press in Calgary Herald.)

Washington, Nov. 14.—Great Britain and France, each \$4,000,000,000 debtors of the United States, today sought relief from further payments pending an international conference on world debt problems.

Publication of their formal requests, made to a government already on record against further reduction or cancellation, coincided with a telegram from President Hoover to President-elect Franklin D. Roosevelt, inviting his successor to a conference on the subject—an action without exact precedent in all presidential history.

Chairman Collier, of the House of Representatives ways and means committee, today said he would oppose any effort to cancel the European war debts, and that "if the debtor nations can't pay, let them owe us."

Chinook and District Agricultural Society

The Annual General Meeting of the above society will be held in the Agricultural Hall on Saturday, November 20th, at 8 p.m.

B. G. Todd, Secretary

Rearville News.

Miss Faye Robinson spent Friday with her sister, Mrs. T. Mas

on.

Mrs. R. Holder is able to be around again after a siege of lunago.

Mr. and Mrs. Sulter, Mr. and Mrs. F. Nelson and Miss Hanes were Sunday guests of Mr. and Mrs. Waterhouse, of Cereal.

Burnell Courts is looking after Mr. Walsaz's chores while Mr. and Mrs. Hanes are in Calgary.

Gwen Hunney had the misfortune to have a horse fall on her foot. Will it be better by the next dance, Gwen?

Mr. and Mrs. Sulter made a business trip to Buffalo last week.

It looks like Old Winter is here for good, and we don't like it at all.

Curiosity.

"No sir," said the clerk, "I can't give you a room. The best I can do is to give you a half of a private dining room. There's a screen across it and a lady has the other half, but I reckon she won't bother you."

Thirty minutes later he ran into the lobby wild eyed and pale.

"Hey," he yelled to the clerk, "that woman is dead."

"I know it," said the clerk, "but how did you find out?"

MEETING OF SOUNDING CREEK COUNCIL

The regular meeting of the council of the M. D. of Sounding Creek was held on Saturday, Nov. 5.

Minutes of last previous meeting were read and adopted. Interviews were granted to J. O'Brien, C. H. Murphy and Geo. J. Connell re seed grain accounts.

On motion of Mr. Cameron Mr. Lawrence was named a committee of one to investigate the possibility of providing a stove for Miss Fumish, award of the municipality.

In the Murphy matter it was decided to settle the 1931 seed grain account for \$53, to be paid by Dec. 1.

An offer of F. W. Edler to pay \$70 on his seed grain account to release seizure was accepted on motion of Mr. Cameron.

Further discussion was held by the council with regard to the creation of an enlarged community pasture in township 31, range 9. It is the intention of the council to create this pasture in the northwest portion of the municipality as soon as necessary arrangements can be made.

The time for taking advantage of 5 per cent discount on payment of current taxes was extended from Nov. 1 to Dec. 15.

Date of annual meeting was set for the 3rd Saturday in February, as provided by statute, and will be held in the Rex Theater, Youngstown. W. Summerbell was elected returning officer on motion of Mr. Cameron.

On motion of Mr. Armstrong H. D. Connor was appointed deputy returning officer for divisions No. 1 and J. E. McLeod for divisions 2 and 4.

Mr. Coxin moved that polls for divisions 2 and 4 be the municipal office, Youngstown, and for division 1 at Glen Johnson's house, on the north half of 21 29 7.

The financial statement was approved on motion of Mr. Lawrence.

The municipality will again be a member of the Alberta Association of Municipal Districts on motion of Mr. Cameron. On motion Mr. Armstrong K. V. Lawrence was appointed delegate to the convention, with Mr. Synnuck as alternate.

Accounts totaling \$1,231.58 were ordered paid.

Adjournment to Dec. 10.

A Shovel Hand Wanted.

A sad looking specimen of the genus "hobo" applied at a house for a handout. The door was opened by the man of the house himself who happened to be superintendent of a large factory. Being short of help at the moment he said to the tramp:

"Are you looking for a job?"

"What kind of a job?" asked the Weary Willie

"Can you do anything with a shovel?"

"Sure," was the answer, "I can fry ham on it."

Perhaps You Have Forgotten that Your Subscription to The Advance is Due

If such is the case this will serve as a gentle reminder. We admit that payment of subscription accounts gives us a delightful thrill and helps fill some of the vacant nooks in the old pocket-book

We are Finding It Hard Sledding, Perhaps it's the Same with You--

If so, and you are right down with the sleigh runners on the gravel don't feel that we want to add any to the load, pay when it's easier, and in the meantime—"Let's be friends"

The Chinook Advance

OBITUARY

John Whitley.

The funeral of the late John Whitley, who passed away on Tuesday, November 1st, took place on Monday last.

Service was held in the United church, the pastor, Rev. T. J. Stainton, together with Rev. J. A. T. McLagan, officiating. Interment was in the Innisfail burial ground.

The funeral arrangements were in charge of Mr. R. D. Sheffield.

The pall bearers were the four sons of the deceased, viz: Messrs. William, Tim, Nelson and Charles Whitley and Messrs. Fred Curtis and Frank Carpenter.

Mr. Whitley was sixty-three years of age, a native of Froese, Somerset, England. He came to Canada in 1888, and lived at Campbelltown, Northumberland County, Ontario, until 1900, when he came west and spent some years at Brooks and Chinook. In 1924 he was at the coast, and in 1925 came to Innisfail where he resided until his death.

He is survived by his wife, six sons, William, Tim, Nelson and Charles, of Innisfail and Joseph and Harry, of Peace River; also

three daughters, Mrs. Flora Cold-bath, of London, Eng.; Mrs. Katherine Elliott, of Youngstown; and Mrs. Rose Curtis, of Innisfail.

Mr. Whitley was an Oddfellow, a member of the Masonic order, and was also a staunch Orangeman and the obsequies were under the auspices of the latter order and of the Innisfail Lodge L.O.L. 712.

Forty of the brethren of the Innisfail lodge assembled to do honor to the memory of a departed brother, and marshaled by Bro. Dave Arnell marched in procession to the cemetery headed by the lodge banner.

The scene at the graveside was particularly striking, the lodge brethren in a square surrounding the grave, while Bro. Rev. J. A. T. McLagan read the impressive ritual which is a prominent part of the last farewell of the Orangemen... Innisfail Province.

Mr. Whitley at one time lived at Kinmundy, and was well known in Chinook.

Personal—"A young lady to whom black is particularly becoming, would like to meet a gentleman in your health; object, widowhood."

Strength And Courage.

Can we do better this week, following so soon after the observance of Remembrance Day, than reproduce in this column an editorial from the National Home Weekly, published in Winnipeg? We think not. So here it is!

Gradually it is becoming clear to the minds of most people that conditions today are far more serious than they were during the years of the War. For then, men were buoyed up by hope. They knew that in time their troubles would be over. But now the time has come when this present misfortune will end. The mist of yesterday has become the dense black cloud of today. With many, despair has sapped the strength from courage.

It will not be out of place, then, to recall the words and deeds that during the War inspired hope and urged steadfastness. Of all the written messages there was perhaps nothing finer than the address of General Currie to the Canadian army on the eve of the great advance in March, 1918. In it he makes clear the seriousness of the struggle and the danger of defeat; he indicates the successes already won, and states the need of the moment. Finally he speaks of the reward of victory. The message will be read again with vivid recollections by those who were in the ranks in 1918. May all who read it now for the first time feel that it is equally appropriate today. The problems to be solved, the forces to be overcome, are just as real and as great, and the virtues of courage, faith, and self-sacrifice are just as necessary.

SPECIAL ORDER, March 27th, 1918:—"In an endeavour to reach an immediate decision the enemy has gathered all his forces and struck a mighty blow at the British Army. Overwhelmed by sheer weight of numbers the British Divisions in the line between Scarpe and Oise have fallen back fighting hard, steady and undismayed."

"Measures have been taken successfully to meet this German onslaught. The French have gathered a powerful army, commanded by a most able and trusted leader, and this army is now moving to our help. Fresh British Divisions are now being thrown in. The Canadians are soon to be engaged. Our Motor Machine-Gun Brigade has already played a most gallant part and once again covered itself with glory."

"Looking back with pride on the unbroken record of your glorious achievements, asking you to realize that today the fate of the British Empire hangs in the balance, I place my trust in the Canadian Corps, knowing that where Canadians are engaged there can be no giving way."

"Under the orders of your devoted officers in the coming battle you will advance or fall where you stand facing the enemy."

"To those who will fall I say, 'You will not die but step into immortality. Your mothers will not lament your fate but will be proud to have borne such sons. Your names will be revered forever and ever by your grateful country, and God will take you into Himself.'"

"Canadians, in this fateful hour, I command you and I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. On many a hard-fought field of battle you have overcome this enemy. With God's help you shall achieve victory once more."

The seriousness of conditions today may be observed in both national and international affairs. At home trade is languishing, the army of the unemployed is increasing, and worst of all young people just entering manhood and womanhood are being deprived of the opportunity to earn a living or to form life associations or to contribute to good citizenship. The result is a growing feeling of discontent. Each individual is inclined to blame all others for prevailing misfortune.

Internationally the problem is even more acute. Debt countries are refusing to pay, because they feel that they have been unjustly treated, or because they no longer have world-coin to meet the demand. Nor will tariff barriers permit payment of the form of goods. To accentuate the mischiefs of the causes of war, the quarrelling is easily possible when people are prosperous and inclined to be neighborly, it is almost certain to occur in violent form when they live in discontent in each other, and when extreme distress prevails.

The only way to avert disaster is the way of usefulness and self-sacrifice. It is true today as of old that regardless of race, color or creed man is his brother's keeper. It is true now as two thousands years ago that man shall find that those who are losing them. The victories of peace are as glorious and as costly as the victories of war.

Driven by the higher motive it is easy for man to transform a world. The channels of trade will be thrown open, waste areas will be populated, armaments will be cast away, production and consumption will find a balance. Within the state, opportunities for culture and comfort will be measurably equal for all. The man at the machine will be of more value than the machine's production, the needs of the many shall be of more account than the desires of the few, the rich shall not batten on the poor, the laws of the land shall not favor the designs of the privileged class. But each man, recognizing that his neighbor has rights equal to his own, shall honor justice and practise righteousness. Thus in peace may they catch the spirit of General Currie's message. In 1932 men may be as brave, as loyal and as nobly self-sacrificing as they were in 1918. May they hear again the words, "Canadians, in this fateful hour, I command you, I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. . . . With God's help you shall achieve victory once more."

Season To Open Early

Steamship Sailings From Britain To Churchill To Start In July
Steamship sailings from the United Kingdom and Antwerp for Churchill will start in July, 1933, according to word received by D. A. Ross, secretary of the board of trade, from Thomas Harting and Sons, steamship agents, Montreal. The first ship will load general cargo in England and European ports for the prairie provinces. The communication states that the rates will be the same from England and Belgium to Churchill, as from overseas ports to Montreal, thus giving prairie buyers a distinct advantage in lesser rail haul.

Green apples can be made ready in 48 hours by treating them with ultra-violet light, but the process is at present very costly.

Puerto Rico, Hawaii and Alaska are buying more automobile casings this year than last.

Had Spectacular Career

British Mourns Captain Hunter "Father Of The Navy"
Britons mourn the death of Capt. James Edward Hunter, 83, "Father" of the Navy. Captain Hunter entered the Royal Navy as a cadet in 1848 and began a spectacular career. He first figured in dispatches when, as a young officer, he led six volunteers in a boat in a gale off Sebastopol in the Crimean War and saved 47 men marooned on wrecks, braving heavy Cossack fire. After retiring from active service Captain Hunter became engineer-in-chief of the navy.

Just His Bad Luck

Customer: "You said the tortoise I bought from you would live three hundred years, and it died the day after I bought it!"
Dealer: "Now, isn't that too bad? The 300 years must have been up."

In a recent month 3,000 radio licenses were issued in England.

Her Heart Was Weak

Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes:—"I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Old Country People Drinking Goat's Milk

More Easily Digested and Free From Tuberculosis Germs
The people of the United Kingdom are drinking more goat's milk. Twenty years ago the production was 2,000,000 gallons a year. Six years ago it had increased to 12,000,000 gallons. Today it has reached the high figure of 30,000,000 gallons (declares the Sunday Express). And these are the reasons:

Goat's milk is more easily digested than cow's milk; it is richer in butter-fat; it is free from tuberculosis germs; and women have found that it will make their skins more beautiful. They have learned that a "peach-bloom" complexion can be acquired simply by bathing the face, neck, and arms two or three times a day with goat's milk.

STAIRS MADE HER GASP FOR BREATH

Penalty Of Excess Fat

Although she has lost 7 lbs. of her overweight, this woman finds that 7 lbs. has made a remarkable difference to her. There can certainly be nothing wrong with a reducing treatment that brings such increased energy and vigor.

Her letter reads:—"I am 53 years old and my height is 5 ft. Last year I weighed 154 lbs. For six months I have been taking a half-teaspoonful of Kruschen Salt, making no change in my diet. Now I am less round the hips and only weigh 147 lbs. dressed. But I feel lighter and can now run upstairs, which before used to make me gasp for breath. Everyone says how well and fit I look, as I am in a store and get no walking exercise at all. The results may not be startling, but the fact remains that I feel much better than of late years—not so heavy—and I am now enjoying dancing."

(Miss) J. H.
Kruschen is based on scientific principle—it's an ideal blend of 6 separate minerals which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while you're training yourself down to a point of normal weight.

Means Revenue For Paris

Electrically Lighted Ad On Eiffel Tower Changes Fourteen Times

The Citroen electrically lighted ad. on the Eiffel Tower split Paris into factions. The friable artistic considered it sacrilege, the stolidly practical considered it added revenue for the city. It changes 14 times—a giant rose bush, flashes of lightning, a constellation of stars, a sky high fountain rising and falling, etc. Only once does it burst into a full length spelling out of C-I-T-R-O-E-N.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel
Your liver's a very small organ, but it certainly does a lot of work. It cleanses the organs out of filth by retaining to your out its two pounds of liquid bile every day. You won't completely correct such a condition by taking cod, oil, mineral water, laxative candy or chewing gum, or anything. What you need is a liver stimulant. Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists.

Stolen Auto "Shouts"

A stolen automobile will "shout" for help if equipped with the "Bling-bong" alarm, which has been perfected by a Chinese inventor in Shanghai. It is a small electrical box, which can be placed anywhere in the car. A switch is turned on when the auto is parked. When the car is touched the box lets out a shriek, and will continue to do so indefinitely.

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradiate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from the scourge of the bronchial tubes. It is sold everywhere.

Takes Position As Walter

A Cornish baronet, who is eighth holder of the title is going to Tanger as a hotel waiter, and has pledged himself to remain for six months. He is Sir William Lav Williams, aged 25. He was educated at Cambridge and has been an officer in the Royal Welsh Fusiliers.

Vacuum cleaners are being rented in Belgium for 28 cents a day.

Twenty-seven United States submarines are out of commission.

W. N. U. 1908

Landlords Would Be Protected

Quebec May Grant Them Priority Of Lien On Installment Goods

A bill that would give to landlords priority of lien on goods bought by installment, instead of the merchants who are to be protected at the next session of the Quebec legislature, it is announced by Rosario Gaudry, secretary of the Property Owners' League of Montreal. Such a measure, Mr. Gaudry explained, would provide landlords with further protection against tenants who went beyond their means in the purchase of long-period-to-pay goods.

Latest Flying Invention

Neuest Plane Can Be Controlled By One Finger

An aeroplane which can be flown, manoeuvred, and landed with only one finger is the latest flying invention. The machine is of the autogyro "windmill" type and is being built under license near Glasgow.

There is only one control for all movements of the machine. Apart from the operation of opening and closing the throttle, the whole control of the craft literally can be done with one finger.

Persian Balm—there is nothing like it

for creating and preserving a lovely complexion. Cooling, cleansing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth skin, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

Obnoxious Billboards

Often Distract Driver's Attention From Important Traffic Directions

There are two counts against the billboard on the highway. It not only mars the landscape and destroys the natural beauty of roadside scenery, but its garishness also distracts the attention of the driver of the car. Important traffic directions posted along the road are often lost in a welter of commercial signs. In the interests of safety the most conspicuous signs on the highway should be those placed there by the highway department to direct traffic.

Equality Of Punishment

System Now In Use Could Be Vastly Improved

A fine is a most effective way of registering social disapproval and for this reason will probably continue for a long time as a part of our penal system. But who can defend a system which for similar offences fines the wealthy and imprisons the poor? A scientific system of fines which had some relation to the capacity of the individual to pay would probably result in a considerable reduction of the number of criminals for non-payment.—New Statesman and Nation.

English, German and French

English is spoken by 160,000,000 and is understood by 60,000,000 or more who do not look upon it as their native tongue. German is spoken by 90,000,000 and is understood and used by 20,000,000 more. French is spoken by 45,000,000 and understood and used by 75,000,000 more.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far indeed enough to attest its excellence, for in all these countries it is on sale and in demand.

Wholesale commodity prices in Chile are 50 per cent. higher than a year ago.

Recipes For This Week

(By Betty Barclay)

CHERRY ROLLS

1½ cups special cake flour, sifted.
3 teaspoons baking powder.
½ teaspoon salt.
2 tablespoons butter or other shortening.
½ cup milk (about)
1 can (2 cups) red cherries, seeded and drained.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll ¼ inch thick. Cover with cherries. Roll in long roll, pressing edges together. Cut into 1½ inch slices. Place in greased pan and pour cherry sauce over them. Bake in hot oven (425 degrees Fahrenheit) 30 minutes, basting often. Serve hot, with sauce poured around them and a tablespoon of whipped cream placed on each slice. Serves 6.

SAVORY MEAT LOAF

2 thin 2-inch slices salt pork, diced.
2 pounds round beef, ground.
½ cup quick-cooking tapioca.
½ small onion, finely chopped.
2 cups canned tomatoes.
½ teaspoons salt.
½ teaspoon pepper.

Try out salt pork until golden brown. Add pork and drippings to other ingredients and mix thoroughly. Bake in loaf pan, 7 x 5 x 3 inches, in hot oven (450 degrees Fahrenheit) 15 minutes; then decrease heat to moderate (350 degrees Fahrenheit) and bake 30 minutes longer. Serve hot or cold. Garnish with parsley. Serves 10.

Miller's Worm Powders work so effectively that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation. Nothing could be more thorough or desirable than their action.

One Thing They Know

"People who live in these apartment buildings don't know anything about each other, I hear," said the man from the country.
"No," replied the flat dweller, "but you can't have cabbage for dinner without everybody else in the building finding it out."

Britain's longest-lived people have been found in the rural districts near Newcastle, where many people still lead quiet primitive lives.

More used cars are being sold in France than in many years.

OVER 17 MILLION JARS USED YEARLY

Interesting Broadcasts

National Council Of Education Sponsoring Programme Of Educational Value

The "N.E.C." programmes over C.B.Y. for the five weeks dating from October 30 will be something new in broadcasting. Programmes will be given every day except Saturday and the series will deal with conditions as they were in 1800. Sunday programmes will feature music of 1800 including the masters, Beethoven, Mozart, and Haydn, and will be directed by Miss Eva Clara. Mondays will be devoted to outstanding men, Napoleon, Wellington, Pitt, Stein, and Washington. Industry and Commerce will be the theme for Tuesday, and Literature will be featured on Wednesday, dealing with Goethe, Scott, Byron, Wordsworth and Chateaubrian. The schools, farms, doctors, preachers, and dialects of 1800 will be dealt with on Thursdays, and Fridays are set aside for the science and inventions of that period. Prominent Winnipeg speakers will deliver the addresses. The weekday programmes will commence at 8 p.m.

These broadcasts are sponsored by the National Council of Education under the chairmanship of Mr. Edward Anderson, K.C., with Mrs. R. F. McWilliams, chairman of the Radio Committee, in charge.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

The largest valley in the Great Rift of Africa, which begins in the north of Palestine and stretches south for a distance of 5,000 miles.

John C. Calhoun, vice-president under John Quincy Adams, was the only one ever to resign from that office.

ACID STOMACH

Before each meal a teaspoonful of Phillips' Milk of Magnesia to sweeten stomach.

MADE IN CANADA

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

Since the Ottawa Economic Conference events appear to be steadily moving forward towards making effective the agreements reached there, Principal among the agreements are those affecting livestock and animal products.

The principle adopted by the United Kingdom for the control of her markets for meats is "limitation of imports." This system of limitation of imports is being applied to all the important classes of meats—beef, lamb and mutton, bacon and hams, and certain classes of by-products.

In Canada, more has been said about the agreement as it affects bacon. However, it would appear that the determination by Britain to limit the importations of all meats, is the really big fact to grasp. It is this fact that gives the assignment by the United Kingdom to Canada of 280,000,000 pounds of bacon a meaning and significance.

From the standpoint of the Canadian livestock industry it is important, then, that the agreements, as they apply to all classes of meats, should be known. It would appear that the United Kingdom adopted, at the Conference, the principle of stating to each Dominion what she undertook to do with reference to the meat and meat products in which each Dominion was mostly interested. This, however, does not limit the effect on any particular meat to the Dominion to which the United Kingdom declared her policy. The agreements should be viewed as a whole in order to understand the policy adopted by the United Kingdom.

The agreements apply to certain classes of meats, but for some time Britain has had restriction of imports of other classes of meats. These restrictions are mostly based on protection of the health of British livestock. In practice the restrictions confine imports of live cattle and other animals to those from Ireland and Canada. Imports of fresh meats from Europe are embargoed, which practically limits this import trade to the Irish Free State. These restrictions, then, already limit imports of fresh meats and live animals. Other meats enter Britain as chilled, frozen, or cured. The policy declared by the United Kingdom at Ottawa will limit the importations of these latter classes of meats.

The policy declared by the United Kingdom with regard to livestock and animal products may be summarized thus:

Live Cattle—removal of restrictions on imports of Canadian commercial cattle and, in part, on the stock that may be used for breeding.

Chilled and Frozen Beef—regulation of imports from foreign countries on the basis of an agreement reached with Australia.

Frozen Mutton and Lamb—regulation of imports from foreign countries (and from Australia and New Zealand for a period) on the basis of an agreement reached with Australia and New Zealand.

Bacon and Hams—declaration to undertake the regulation of importation of bacon and hams and, on the basis of an agreement reached with Canada, to guarantee free entry for up to 2,500,000 cwt. per annum of Canadian bacon and hams of good quality (280,000,000 lbs.).

The adoption, by the United Kingdom, of what would appear to be a most momentous policy, was the result of a series of events and conditions. European importing countries and America had steadily been raising barriers of various kinds against the importation of animal products. Great Britain remained the only open market. Therefore, all those countries that had formerly been exporting a part, or the bulk of their products to Britain, and all the exporting countries which had not formerly sent product there in quantity, were forced to concentrate more and more of their surpluses on that market.

In addition, production particularly of bacon and mutton heavily increased. The collapse of grain prices which gave European bacon producers very cheap feed for hogs in 1930 and 1931 induced large increases in production, not only in the countries that had formerly been supplying the bulk of British imports, but also in the countries that lately had been forced to send their bacon to Britain. Furthermore, the new countries to enter the British bacon market, such as Poland, Estonia, Lithuania, Latvia and Holland, in order to develop the proper kind of hog and establish themselves on the British market adopted various scheme of bounties and subventions.

Britain's declared policy gives an

aspect to the future which deserves the closest study and consideration. Present prices for bacon and hogs are so low as to be extremely discouraging. If the future is to be judged only by present price conditions, there is no prospect; the hog industry in all countries will die. But it is these conditions which led the United Kingdom to determine on the policy which was declared at Ottawa. Apart altogether from that declared policy, present price conditions, viewed in their proper light, are certain indications of better prices in the future.

Under extreme conditions, such as at present, the industries best suited to certain countries always survive. Canada is one of the countries that has the natural conditions for the survival of the hog industry. The policy declared by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

(By Ruth Rogers)

PARIS IS COLLAR CONSCIOUS YOU MUST HAVE ONE FOR YOUR LAST YEAR'S DRESS

It will bring it right up to the minute. Here you have four darling ones to choose from—or you can make all four. The pattern includes these four smart designs.

View No. 1 is the small nun's collar which can be made of a very small piece of material. It is especially nice in fine wale pique or rough crepe silk in white.

It will be rather difficult to make a decision in the three cape models. One is equally as smart as the other. View Nos. 3 and 4 will completely transform a last year's dress with a low neckline, making it appear like a new Paris model.

View No. 2 is a very youthful and flattering model.

White crepe satin, white rough crepe silk or colors and fabrics to tone with your dress are appropriate. Style No. 953 comes in one size for misses and ladies.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

There Is a Difference

There really is a difference between drinking and the evils of drinking, just as there is a difference between eating and the evils of eating. A lot of people have died from eating too much.

"Oh, no, don't trouble to send it—I have the car."—The Humorist, London.

New National Park Planned

Two Sites On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments, and F. M. Wardie, chief engineer of the federal parks branch, has been on the coast recently laying the groundwork for such a project.

Garibaldi Mountain is favorably regarded as a site for the new park, although the parks branch is said to be eager to establish a sea level park to complete its trans-Canada parks system. For the latter purpose a park site on the west coast of Vancouver Island is being considered. The only other national park on Vancouver Island is Strathcona, which, however, is mountainous and somewhat inaccessible.

Colonel W. W. Foster, member of the Mount Logan expedition, of several years ago and one of the best known mountaineers in Canada, has completed a report on the Garibaldi project and this has been sent to Ottawa.

Tramped Historic Highway

Forty-six students from Germany who recently hiked through the west highlands of Scotland, tramped along the highway between Glencoe and Kinlochleven, which was constructed during the World War by relatives who were then prisoners of war.

A new product similar to celluloid and made of wood pulp, has been developed in Norway.

Andros, one of the Bahama Islands, has a lake which generates its own soap from its alkaline limestone bed.

United States Rigidity

Enforcing Restrictons

Immigration Figures For 1932 Are Lowest On Record

Only 824 Canadians were admitted to the United States as immigrants in August, against 1,108 in August, 1931, the labor department's last monthly report shows. In the period 1926 to 1930 Canadian immigration to this country in August averaged 7,000.

Restrictions on the influx of people are being enforced even more severely than in 1931 when the number admitted was the smallest in a century. Only 2,719 from all countries passed the gates last August, as compared with 4,090 in August, 1931, and an August average of 24,000 for the years 1926 to 1930. Indications are that for 1932 aggregate immigration will not reach 25,000, which would be the lowest figure on record.

Last August 8,753 persons who had established domicile in the U.S. left to live permanently elsewhere. "The exodus of alien residents," says the report, "now exceeds the new arrivals by over three to one."

By use of a machine just patented in Germany, lumber may be fed into it at one end to appear as finished boxes at the other at the rate of two a minute.

Employer—Can you show a recommendation?

Applicant—Well, I was recommended to mercy by a jury once.

A magistrate says no man can drive a car properly while he's kissing a girl. The more serious thought is that few men can kiss a girl properly while they're driving a car.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

How Cancer Begins

Everyone Should Know the Symptoms and Receive Early Treatment

Cancer never begins as cancer, Dr. Joseph C. Bloodgood, cancer research worker of Johns Hopkins University, Baltimore, told the Ottawa Medical Chirurgical Society.

"It begins as a single spot," he said, "and this normal cells of that spot are changed to abnormal cells, which are not cancer cells."

Chronic irritation, injury or pre-existing lumps such as warts or moles and unhealed wounds anywhere are the site in which cancer develops, the doctor continued.

He stressed it was important that everyone should know the symptoms, signs of little things that are not cancer but which may become cancer and the earliest stages of cancer are identical.

"On this fundamental advice rests the action of having an immediate examination after the first warning," he declared.

Dr. Bloodgood told his audience women suffering from early detected cancer of the breast run no more than a 25 per cent. risk that attempts to cure them will fail, while those who defer examination through ignorance reduce their chances of cure to 10 per cent. or less.

A semi-annual examination of mothers, he said, would permit detection of spots in the cervix which are not cancer but which may become cancer or are the earliest stages of cancer. Radium treatment could then be used to cure a large percentage of the cases.

Under present conditions, he declared, most mothers seeking examination for cancer of the cervix had the disease in such an advanced stage that there was no more than a 10 per cent. chance of cure.

A Prosperous Town

Full-Time Job For Every Man In Corbin, B.C.

Which is the most prosperous town in Canada?

According to Thomas Uphill, Labor member for Fernie, B.C., the nomination should go to Corbin, B.C. Every man in the town has a full-time job. Corbin is a coal mine town, and although the mine employs only 300, there are more than 100 automobiles there. The town incidentally is the only place in British Columbia where not a dollar of unemployment relief money has so far been spent.

But just a few miles away, at Fernie, B.C., is one of the poorest towns, from the economic standpoint, according to Uphill. The city is unable to meet its one-third share of unemployment relief; already it is far in arrears.

Mr. Uphill created a sensation at the last session of the legislature by proposing that the government should subsidize by selling titles. Wealthy men would be eager to pay a stated sum for a provincial knighthood, he said.

U.S. Farm Population

Many Return To The Land As a Result Of Hard Times

Hard times have resulted in a trek "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 32,000,000, an increase of about 2,000,000 in three years.

Farm population in the United States reached a peak in 1910, the department says, when it was 32,077,000. Thereafter it steadily declined for twenty years as country families moved into the towns to share the profits of the long industrial boom. United States citizens living on the land numbered 31,570,000 in 1920 and 30,069,000 at the start of 1930. The three-year depression has driven nearly two million people back to rural life, so that farm population now approaches its 1910 high point.

Only One Answer

He—You're so good at conundrums—try this.

She—Sure, go ahead.

He—Take away my first letter, take away my second letter, take away all my letters, and I am still the same. What am I?

She—That's easy you're a nail carrier.

To ward off a hall storm, peasants of southern Europe used to ring bells or blow horns.

A distinctive Canadian formula for the extraction of radium from the pitchblende ore found at Great Bear Lake, Northwest Territories, has been developed by scientists of the Canadian Government Department of Mines, according to a statement just issued by Hon. Wesley A. Gordon, Minister of Mines. The new formula is the result of more than a year's intensive research work by chemists of the Department of Mines.

The Canadian process, according to Mr. Gordon, will permit as great, if not greater, percentage of recovery, involving shorter time and less complicated operations than any of the known methods. Canada will, it is expected, now be able to supply not only her own radium needs for therapeutic, scientific and commercial purposes, but will be able to enter world markets.

Partly on account of the high-grade character of the Canadian ores and partly because of the shorter time and simplified method of the new process, it is believed that the costs of reduction will be considerably less than under other methods of extraction. Hydrochloric acid is used as a solvent in the new method instead of the usual sulphuric acid and a large number of stages formerly considered necessary have been eliminated. Instead of about forty operations, supposed to be used in other countries, radium salts have been produced in the laboratory of the Canadian Government Department of Mines with less than half that number of steps. The chief cost in radium reduction lies in cost of chemicals, about three tons being required for the treatment of every ton of ore. The new process has been adapted to treat with almost equal success both siliceous ore and the silver carbonate ore with which pitchblende is found associated in the Great Bear Lake field.

About 4,000 grams of radium-bearing concentrates have been extracted in the experimental work. The yield worked out at one gram of radium from ten tons of pitchblende from the Great Bear Lake ore. A radium refinery is to be established at Port Hope, Ontario, where the ore will be taken for the extraction of radium and by-products, such as uranium, lead and silver.

Forester Explains

Coloring Of Leaves

Contrary To Popular Belief Frost Is Not Cause

Jack Frost's only paint is white, John Keller of the Pennsylvania State Department of Forests said in explaining that time, not frost, gives forest leaves their autumn colors.

"The ripening of leaves is the cause of the change in color of the forest foliage and not the action of the frost," said Keller in disputing a popular belief.

"Frost may hasten the processes of turning leaves brown. A heavy freezing in late September or early October robs rather than aids the leaves of their chances for brilliant coloration.

A long dry autumn with not too heavy frosts brings the finest succession of colors, while chemical changes in the mineral substances within the minute leaf cells produce the wonderful shades of red and yellow, according to Keller.

Leaves fall from trees because they are "worn out" and have been drained of all the pulp that was stored in the twig, the forestry expert said.

The Sounding Creek Map Sheet

Sounding Creek is an intermittent stream rising about twenty miles north of Youngstown, Alberta, which after flowing in a southerly and easterly direction turns north again and empties into Sounding Lake. The outlet of Sounding Lake is Eyehill Creek which flows northeasterly to Manitoba Lake which, having no outlet, is strongly alkaline. Sounding Creek sectional sheet just published by the Topographical Survey, Department of the Interior, shows a considerable length of the creek from which it is named.

Germany's Newest Idea

In Germany, where new forms of transportation are constantly appearing, a foot-propelled bus is being used for leisurely hikes along the highways and byways. Its four industrious peddlers can keep the car doing six and a half miles an hour. The first car of this kind was built by four unemployed mechanics, but cars of similar type are gaining vogue.

+ Do You Know? +

Photograph, Canadian National Railways

THAT the most easily and most quickly tamed of the wild animals of North America is the beaver? After only a few days in captivity a beaver will become quite tame. If kindly treated, and not only submit to, but welcome petting. The photograph shows an Indian girl holding a beaver that had been in captivity only eight days when the photograph was made.

THE ATTITUDE OF BRITAIN ON DISARMAMENT

London, Eng.—"We are endeavoring to translate into practical form the overwhelming desire and passionate hope of the British people to make disarmament an accomplished fact."

To a world perplexed with the assertions of various powers concerning the vital question of disarmament, whose efforts towards that end have thus far met with small success, Sir John Simon made the foregoing statement in a speech in a crowded House of Commons.

It was significant that the British government chose, through its foreign secretary, to announce its attitude to the disarmament problem on the eve of Armistice Day. "A fair meeting of Germany's claims on the principle of equality," was favored by Sir John, who pleaded that "the European states should join in a solemn affirmation that they will not in any circumstances attempt to resolve any present or future differences by resort to force."

Recognition of the right to parity in arms would entail on Germany, along with others, the acceptance of this corresponding obligation of an assurance of peace. Sir John recognized the fact that the arms limitations imposed on Germany by the Treaty of Versailles were to be preliminary to a general limitation of arms. It was not the desire of other countries to inflict permanent inferiority upon Germany but the hesitancy to change the Versailles Treaty restrictions was from anxiety as to the developments that might arise from the resulting situation, with the possible disturbing of the tranquility of Europe.

These further principles were laid down on behalf of the government of Great Britain: 1. That the limitation of Germany's armaments by special provisions in the Treaty of Versailles should be superseded; Any limitation of Germany's armaments should be expressed in a document that would at the same time limit the armaments of other nations.

2. The duration of such disarmament convention should be the same for Germany as for other countries. 3. The British Government was willing in co-operation with other members of the disarmament conference to see the principle of equality in the prohibited classes of armaments (chemical warfare, etc.) was embodied in the new document.

Railway Co-Operation

C.N.R. President Believes Two Systems Should Be Under Separate Management

Ottawa, Ont.—Canada's two major railway systems should co-operate to avoid wasteful expenditures but remain under separate management, S. J. Hungerford, president of the Canadian National Railways, to the senate committee reviewing railway legislation, proposed recently.

The National president sent the following telegram to Senator George P. Graham, chairman of the committee: "Canadian National has no particular further representations to make as situation stands at present but desires to reiterate our conviction that the two systems should be under separate management but in active co-operation with a view to avoidance of any wasteful expenditures and un-sound competition."

E. W. Beatty, president of the Canadian Pacific Railway, will appear before the committee next week to make representations. Officials of the Labor unions also will appear next week but Mr. Hungerford's telegram indicated the Canadian National was not seeking to make representations.

Banana Crop Damaged

Jamaica Hurricane Causes Loss Of Three Million Dollars

Kingston, Jamaica,—Fully 50 per cent. of the banana cultivations on this island were wiped out by a terrific storm which struck West Jamaica.

The centre of the storm hit Point Negril, the western extremity of the island, and the wind registered 75 miles an hour. The damage was estimated at \$3,000,000. There was no loss of life.

Pire takes 30 lives in the United States every day.

London's 142 hospitals had a total income of \$19,055,000 last year.

W. N. U. 1968

Banker Foils Bandit

Vancouver Hold-Up Is Frustrated By Action of Bank Manager

Vancouver, B.C.—Less than two hours after a lone gunman attempted to hold up the Sixteenth Avenue and Oak Street branch of the Royal Bank of Canada, police arrested a suspect who is being held for questioning.

The man was arrested at his home by officers, who stated that on searching his room they found a revolver from which a bullet had been fired recently.

Quick thinking and prompt action by E. Devereaux, manager of the branch, foiled the holdup attempt and demonstrated again that the manager was no easy mark for "stick ups."

Shortly before noon a man entered the bank carrying a satchel. Going to Devereaux's desk he pointed a gun at the manager. Devereaux immediately dropped behind the counter and reached for his own gun. The bandit fired one shot and fled in a car, which was recovered by police 20 minutes later and discovered to have been stolen from H. Wright.

On July 28 last two men entered the bank and attempted to hold up Devereaux. The manager rushed into his office and fired several shots through the window to attract attention, frightening the bandits, who fled in a waiting car.

New Rules Issued

Conditions Under Which Civil Servants May Hold Municipal Offices

Ottawa, Ont.—The government has issued a list of conditions under which civil servants may hold municipal offices. The order applies throughout Canada.

In all cases permission must be secured from Ottawa before a civil servant can take a municipal election. If the post he seeks carries a salary or remuneration of \$500 or less he may hold it without severing his connection with the government.

If the salary is above that figure, he must secure leave of absence without pay, devoting his full time to the municipal office.

Caught In Flood Of Oil

Two Men Drowned In Peculiar Accident At Montreal

Montreal, Que.—Caught in a flood of fuel oil, Placido Bourgeois, 45, and another man were drowned at the plant of the Imperial Oil Company when a huge tank containing 30,000 barrels of fuel oil burst.

The men were digging near, standing in an excavation several feet deep. The gush of oil from the broken tank overwhelmed them and both drowned before help arrived. Details as to how the tank broke were not immediately available, but it was stated there was no explosion of any kind. One body was recovered.

Build More Elevators

Vancouver Only Port In The World To Increase Elevator Capacity

Vancouver, B.C.—By December 15, Vancouver's grain elevator capacity will be approximately 1,000,000 bushels greater than at present, this being the only port in the world today where additional elevator construction is being installed.

Three additions to grain elevators are nearing completion, two of which are expected to be finished by December 1. Thus, Vancouver's present capacity of 16,205,000 bushels will be increased to 17,830,000 bushels.

No Request For Relief

Ottawa, Ont.—The Saskatchewan Government has made no application to the Department of Labor for relief of farmers in the dried-out areas of the province, Hon. W. A. Gordon said in the House of Commons. He was replying to a question asked by Dr. Thomas Donnelly, Liberal, Willow Bunch.

To Market Canadian Products

Toronto, Ont.—The Retail Merchants' Association of Canada announced it would co-operate with the commerce department of Queen's University, Kingston, in plans for an exhaustive study to formulate definite information regarding domestic distribution of Canadian products.

Geese Tangle Wire Lines

Winnipeg, Man.—Four Manitoba towns—Holland, Glenboro, Baldur, and Cypress River—were without electric power for several hours following an aerial attack by a flock of geese on transmission lines. The birds caused a short-circuit, but only three of them were killed.

Labor Statistics

471,608 Canadians Were Unemployed On June 1st.

Ottawa, Ont.—On June 1, 1931, the date of the Dominion-wide census, Canada's unemployed total stood at 471,608, according to a return tabled by Hon. H. H. Stevens, Minister of Trade and Commerce, in the House of Commons. The wage-earners numbered 2,564,876, of whom \$1.39 per cent. were at work.

The number of "unemployed in the ordinary meaning of the term" was 392,809, or 15.32 of all wage-earners, since these persons recorded themselves to have "no job." Others were laid off temporarily, some were out of work through sickness, accidents and lock-outs.

Of the wage-earners, 2,017,606 were males, and 547,273 females. Of the former, 422,094 were not at work, and of the latter, 48,674.

MAJORITY FOR ROOSEVELT MAY PROVE RECORD

Washington.—Backgrounding the election of Franklin Delano Roosevelt as United States president by what promises to be the greatest electoral majority in the history of the country, Democratic supremacy in the next House of Representatives passed the three-to-one mark as completion of vote-counting neared.

Meantime the party figures in the senate approached the border of a two-to-one margin.

Some 70 house seats remained to be heard from, however. It looked as though Democratic majorities would be increased instead of decreased, but there was nothing finally conclusive as to the final line-up.

From Connecticut to the state of Washington, the mighty rush of Democratic ballots that bore the New York Governor to presidency over Herbert Hoover, took heavy and hourly growing toll of "G.O.P." legislators, some of them veterans of many years at the capital.

Outstanding among the latest Republican old guard victims were the veteran Senator Wesley L. Jones of Washington, and Senator Tasker L. Oddie of Nevada. Their victorious Democratic adversaries were Homer T. Bone, and Patrick A. McCarran.

Other familiar figures who fell before the Democratic hurricane were Read Smoot of Utah, dean of the senate, where he has served for 30 years; George H. Moses for New Hampshire, president pro tem; James E. Watson of Indiana, Republican leader, and Hiram Bingham of Connecticut, administration stalwart.

The lineup for the short session of the present congress, which expires March 4, was in doubt, with the Democrats holding 48 seats, the Republicans 46, and leading in one.

BRITISH MARQUESS MAY CONQUER EVEREST BY AIR

LORD CLYDESDALE - MT. EVEREST - MOUNTAIN OF NEPAL

With the chief object of promoting British prestige—particularly in India—the Marquess of Douglas and Clydesdale, British aviation enthusiast and Member of Parliament, with a few chosen companions, will take off from Northern Bengal sometime within the next few months, in an attempt to fly over the summit of Mount Everest, giant of the Himalayas. Clydesdale is being supported in his perilous venture by the British Air Ministry and India Office, and the Maharajah of Nepal, in whose territory the mountain is situated, has given permission for the flight. Two planes will make the attempt. One will photograph the other if, and when, it crosses the summit of Everest. This is to provide authentic proof that the feat has actually been accomplished.

HUNGER LEADER

Wal Hannington, the militant organizer of the London "hunger march" which recently resulted in serious rioting in the British Capital. Hannington has been arrested, charged with "inciting to mutiny" and he will probably receive a stiff sentence.

Still For Prohibition

Andrew Volstead Has Not Changed His Viewpoint

St. Paul, Minn.—Andrew J. Volstead said he still convinced prohibition is the thing for the United States.

Asked to comment on gains made by the wets in the election, he replied: "I have seen too many elections to have national sentiment mean anything to me. I am still for prohibition." He refused to amplify.

Volstead, co-author of the dry act, pertaining his name, is legal adviser to the district prohibition administrator here.

Free State Will Not Pay Land Annuities

Government Not Giving In To Britain Says De Valera

Dublin, Irish Free State.—Eamon de Valera, president of the council of the Irish Free State, told members of the Flanna Fail party, of which he is a member, that "so long as this government is concerned the land annuities will never be paid."

"The new duties against Irish produce we had expected. We knew that the United Kingdom would attempt to bully and coerce us and if we give in she will always do so," he said.

Balloon Is Released

Calgary, Alberta.—Fifth to be released since September, a large meteorological balloon went soaring skywards from the municipal airport here to record pressure and temperature in the stratosphere, eight to 10 miles above the ground. The balloon was released by C. H. Bromley, representative of the Dominion Meteorological Bureau here.

Wife Of Stalin Is Dead

Most Powerful Figure In Soviet Russia Is Bereaved

Moscow, Russia.—Nadya Allilulova, wife of Joseph Stalin, most powerful figure in all Soviet Russia, but herself a retiring woman who lived privately, is dead.

The Tass agency, official Soviet news organization, announced her death, but gave no details.

She was 30 years old. Only a few months ago she had completed a three-year course at the All-Union Industrial Academy which qualified her as an expert in the production of artificial silk and made her eligible to a high administrative-technical post in an important section of the Soviet textile industry.

In addition to Stalin, their two children—a boy of 12 and a girl of seven—survive her. There also is a stepchild, Stalin's son by a previous marriage, who is 23.

Soldiers On Guard

Militia Men Stationed At Federal Penitentiaries In West

Winnipeg, Man.—Steel-helmeted militia men, with full field equipment and machine guns, are stationed at federal penitentiaries in Manitoba and Saskatchewan.

Twenty-five men in each detachment to leave Winnipeg fully equipped and supplied with a plentiful quantity of ammunition. The troops dispatched to Prince Albert carried a truck load of ammunition, while both detachments had machine guns.

There are nearly 600 convicts at Prince Albert, while those housed at Stony Mountain total several hundred, probably near the thousand mark.

Table Supplementary Estimates In House

Total Of \$1,534,957 Added For Present Fiscal Year

Ottawa, Ont.—Further supplementary estimates for the present fiscal year, totalling \$1,534,957, were tabled in the House of Commons by Hon. E. N. Rhodes, Minister of Finance.

The largest single item in the list is an appropriation of \$975,000, a further amount required for unemployment relief under the administration of the Department of Pensions and National Health.

BRITAIN READY TO AID CAUSE OF WORLD PEACE

London, Eng.—Stanley Baldwin, Lord President of the Council and leader of the Conservatives in the House of Commons, told guests at the Lord Mayor's banquet, Great Britain could make no further step toward disarmament without similar moves on the part of other nations.

Mr. Baldwin, speaking in place of Prime Minister Ramsay MacDonald who was absent on doctor's orders, declared: "The time has come to an end when Britain can proceed with unilateral disarmament."

He added, however, that the United Kingdom was ready at any time to join other nations in plans which might reduce armaments and bring assurance of world peace.

The Conservative leader pleaded for settlement of the war debt problem. "It is essential to the world that ratification of the Lausanne settlements on reparations should now become possible and the work begun there should be completed," he said.

He added he wished the success which had attended the Lausanne parley had been reflected in the world disarmament conference, but reminded his hearers that in accordance with the terms of the "gentlemen's agreement," fulfillment of the accords reached at Lausanne depends on a more lenient debt settlement between creditor and debtor nations. He recalled that Great Britain was resolved to stand by her obligations undertaken under the covenant of the League of Nations, and would continue to co-operate with the League in every respect.

From disarmament and war debts, Mr. Baldwin turned to affairs within the empire and to prospects of increased prosperity in empire countries as a result of the Ottawa economic conference.

Of that conference he said: "Patience, forbearance, sympathy and a sense of one another's requirement, we believe, laid the foundations leading to increased trade between us by lowering economic barriers."

WHEAT CROP ESTIMATE AT A LOWER FIGURE

Ottawa, Ont.—Canada's total wheat crop is now estimated at 35,800,000 bushels less than it was in September, by the Dominion Bureau of Statistics. In a report released Thursday afternoon, November 10, the total wheat crop for the entire Dominion was placed at 431,200,000 bushels compared with September estimate of 467,000,000. Most of the decrease is in the prairie provinces where Thursday's estimate was 411,000,000, and in the September estimate 446,000,000.

Not only are the estimates for wheat down but for other grains as well. In the prairie provinces the estimate for oats is now placed at 247,300,000 bushels. In September it was estimated at 274,700,000 bushels.

"The obvious explanation for the reduction," the report states, "lies in the impossibility of estimating the effects of drought and other depressing influences on yield until actual threshing operations were in progress."

The heavy marketings up to date may indicate that the correspondents on whose returns the estimate is based, have been unduly pessimistic, the report explains.

The crop report Thursday was eagerly awaited by western members of the House of Commons. "It may help the price of wheat some," one of them suggested.

For Sound Money

Bennett Scores Propounders Of New Monetary System

Toronto, Ont.—The credit of Canada has been preserved to an extent that it stands pre-eminent among the nations of the world. From Prime Minister R. B. Bennett came this declaration as he addressed delegates to the Ontario Conservative Association annual banquet.

To the propounders of a new monetary system for the use of printing presses to turn out more dollar bills, Premier Bennett issued a rebuke. "If we do it we destroy this country, and its credit, and once you do that the appetite for more becomes insatiable. It became so insatiable in Germany that it took about 1,000,000 Marks to post a letter."

Doubts Conference Benefits

Hon. W. R. Motherwell Says Agreement Injures Trade

Ottawa, Ont.—"If the 1930 Imperial Conference was a double-eyed, twice-distilled quintessence of humbug," declared Hon. W. R. Motherwell (Lib., Melville), in the House of Commons. He continued debate on second reading of the bill to ratify the Canada-United Kingdom trade agreement.

He was opposed to the agreement, said the former minister of agriculture, for several reasons. He objected to the government's methods of giving preferences by raising tariffs against the rest of the world. Its effect would be to injure Canada's trade.

The agreement had been arrived at under the "thrill" of an imposition of tariffs by the United Kingdom on November 15, said Mr. Motherwell.

Rt. Hon. Stanley Baldwin had given Canadian wheat a preference with one hand and taken it away with the other, when he insisted that the wheat be sold at world prices, Mr. Motherwell said. "The only way to secure a preference was by way of a quota."

He had looked for some remedial action on the part of the British government in connection with the necessity of routing Canadian grain by Canadian ports in order to obtain the preference. He could not believe that the government would knowingly interfere with a long-established trade route, via Buffalo and New York.

It would cost twice as much to convey the wheat by way of Halifax and Saint John, in the increased costs of freight and storage. While he was prepared to patronize Canadian ports, he did not wish to do so at a price of four or five cents extra in the way of expense.

Mr. Motherwell felt that the government's first act at the conference should have been to adjust the exchange situation. If this could not be achieved among "members of the same family," how did the Prime Minister hope to attain it at an international conference among foreigners?

For World Peace

A Peaceful Atlantic All That Is Needed Says Premier of France
Let Britain and America "give us a peaceful Atlantic and we, single-handed, will guarantee the peace of the world," Premier Herriot told the Anglo-American Press Association in Paris, in a speech in which he compared international peace with marriage.

"Peace is like marriage between two countries," Herriot said. "Each gives formal promises to respect mutual rights."

"I have been foreign minister several times, but have been a mayor for many years," Herriot said. He has been mayor of Lyons for 27 years. "As a mayor, one asks two people whether they wish to live in peace and harmony together."

Herriot said he had been a lifelong pacifist, but a practical one. "I don't intend building a castle of illusions in the skies," he said. "I want a practical, mutual peace machine built on the solid ground of Europe."

"As a Frenchman, I have a proposition to make to you British and Americans. Give us a peaceful Atlantic, and we, single-handed, will guarantee the peace of the world."

Evidence Of Herring Find Near Churchill

Species Appear To Be Same As Caught On Norway Coast

Discovery of evidence that salt water herring is to be found in Hudson Bay was told by John Ingebrigtsen, Norwegian fisherman, who arrived in The Pas after spending the summer at Churchill, from whence he cruised again the west coast of the bay while on fishing and freighting trips.

Discovery of the herring was made by Ingebrigtsen at Seary Island, 160 miles north of Churchill. He had found some of the fish washed up on shore. They were approximately eight inches in length and appeared to be of the same species as are caught by fishermen on the coast of Norway.

He took a few samples picked up on the shore to Churchill. He was not equipped with the proper nets to catch any of the herring.

Ingebrigtsen said he also found this summer a new kind of bait useful for bay fishing. It was a small fish apparently plentiful in the bay waters. He thinks perhaps it is a species of caplin. It is the third kind of bait he has found in Hudson Bay, having discovered two kinds while out last summer.

Gas Lighting Still Used

London Has Fifty Thousand Street Lamps Lighted Every Night

You would think, perhaps, that gas illumination belongs to a disappearing epoch—didn't Robert Louis Stevenson write a poem about Leerie and Lamp-lighter? Yet the Gas Light and Coke Company, of London, still carries on, still lights every night nearly 50,000 street lamps. It has just signed a contract with the City of Westminster—that rich municipality which is really one of London's boroughs, and which amongst its 55 miles of streets, contains such famous ones as Pall Mall, Piccadilly, Regent Street and Whitehall—for another fifteen years.

A great contract, if you like, affecting more than half the West End of London; and the Gas Light and Coke Company recently took a few half-page ads in the most expensive papers to announce the fact.

World Is "Coming Back"

Recovery Will Be Hastened If Everyone Does Their Bit

Nothing is now surer than that the world is "coming back." Besides the fact that old "cosmos" has wangled through a dozen or more such crisis, there is in the air every sign of returning recuperation. "The fig tree putteth forth her green figs, and the vines with tender grapes give a good smell." "For, lo, the winter is past . . . and the voice of the turtle is heard in the land." The recovery will be hastened, in the meantime if those of us who have not yet perceived the coming of the dawn will close our mouths, take a hitch on our belt and do what our hands find to do with our might. Let us do less talking and more real work.—S. Davidson.

The oldest town in the world is said to be the ruins of Tepe Gawra, in northern Mesopotamia.

The bleaching properties of chlorine were first shown by a French chemist, in 1784.

Commodity prices in Japan are increasing.

ALL ROADS LED TO LONDON BUT THE MARCHERS OUTSTAYED THEIR WELCOME

Our pictures show two small groups of hunger marchers who descended upon the British capital intent on presenting a petition to the House of Commons. They were unsuccessful and after giving the London police an anxious time for three days departed for home. Left, one of the women demonstrators is given a lift by some of the boys from Brighton. Right, some of the boys in the vanguard carry the banner and march to the tunes from a harmonica.

Cleaning Royal Clocks

Twenty-Four Men Now Busy At Buckingham Palace

Twenty-four men are busy at Buckingham Palace giving the king's clocks their autumn clean.

The work will occupy two months, for they will clean and adjust every one of the wonderful collection of more than 160 clocks at the palace. Even then most of the clocks in the royal collection will remain to be done, for at Windsor Castle there are another 360 belonging to the king, as well as about 250 more at Sandringham and Balmoral and other royal residences.

The king's favorite timepiece is a small clock with a plain mahogany case and a simple plain dial, on the desk of his study in Buckingham Palace, where he does much of his official work. It has been in his possession for many years, and by it he regulates his many audiences and interviews.

The king is one of the most punctual men in the country, and is never late for an official function or a private engagement, so that all the palace clocks must be accurate. It is an expert's duty to wind and adjust them every day.

The most curious clock in the collection is the one made in France in the time of Louis XV, in the form of a negro's head, with one eye showing the hour and the other the minutes.

While great care is taken at Buckingham Palace to keep every clock accurate, at Sandringham, the king's estate in Norfolk, every clock is half an hour fast.

The generally accepted explanation of this is that King Edward wished to make it easier for himself to be in time for engagements, but the real reason is that King Edward, impatient at the shortness of the autumn days when most of his shooting was done, forestalled summer time by ordering the clocks to be advanced. The custom has been maintained ever since.

Has Sense Of Humor

Gandhi Had Clever Reply Ready For Blustering American

It is difficult to associate Mr. Gandhi with a sense of humor, but an artist who painted him while he was in London tells of a rather blustering American who burst in while the Mahatma was absorbed in meditation, reports the News of the World. "Say, Mr. Gandhi," said the visitor, "what good would it do if your country was freed from the English? You would fall into the hands of the Germans or the French or the Russians in no time." "Would that matter?" asked Gandhi, "if we were able to get out of the hands of the Americans?"

No Thanks To Him

"This is a wonderful suit I am wearing."
"It looks very ordinary."
"But the wool came from Australia, English merchants sold it to a Scottish factory, it was woven in Saxony, made into a suit in Berlin."
"Nothing wonderful about that."
"No, the wonder is that so many people can get a living out of something I have never paid for!"

Won Outstanding Honor

Field-Marshal von Mackensen, who, like Hindenburg, is one of the oldest survivors of the Great War, celebrated his eighty-fourth birthday a few weeks ago. One of the many distinctions he has won is that he was the first German soldier of humble stock to reach the rank of General-Field-Marshal. He is the son of a farmer.

Airport Of The Skies

Plan Hugo Overhead Aerodrome In London, England

An overhead aerodrome in the shape of a gigantic wheel half a mile in diameter, at an estimated cost of £25,000,000, is a proposal of London promoters, who hope to have a bill introduced in parliament in the near future for permission to build it. The proposed airport of the skies is to be supported by 36 skyscrapers, in the heart of Central London, over the railway lines behind King's Cross and St. Pancras stations.

The scheme as outlined by W. Craven-Elles, Conservative, M.P. for Southampton, one of the promoters, is as follows:

There will be eight spokes in the wheel design of the overhead aerodrome so that aeroplanes can always land no matter what direction the wind. Each spoke and surrounding rim will be 200 feet wide—three times the width of London Bridge.

The 36 buildings which will form the legs of the aerodrome will be 120 feet high and will be used as warehouses, factories for light industries, flats and offices. One of them will be a hotel. The flats will house 800 families at a rental of 10 shillings a week.

License Suspended For Life

Punishment Imposed By English Magistrate On Drunken Driver

Captain Harry St. Clair Dyson, who had a fine career in the war, was convicted in England by the Southend bench of magistrates on a charge of driving a motor car when under the influence of drink, was fined \$500 or two months' imprisonment, and his driver's license was suspended for the remainder of his life. It was his third conviction on similar charges since 1927.

After the war he was associated with Lord Byng in connection with the distribution of the United Service Fund, and then went to British West Africa, where he contracted malaria.

British Millers Grind Own Wheat

Since the commencement of the present crop year British mills have been using a high percentage of Canadian wheat—undoubtedly the largest percentage since 1928. The re-establishment of a high percentage of Canadian wheat in the mixtures used by British mills is a factor of importance, says a report of the Dominion Bureau of Statistics.

Manitoba Sells Barley To British Brewers

Representative Pleased With Samples From Swan River Valley

A representative of the Associated Brewers has been in Manitoba for some time, securing a shipment of about 60,000 bushels of Manitoba barley to try out for malting purposes.

He has secured shipments from all parts of the province and is taking three carloads from the following: C. W. Banks, Benito; C. H. Goodman, Benito; Wm. Gordon, Kentville.

Major Shaw expressed himself as very pleased with the Valley samples, and if he can possibly do so will arrange to pay a visit to Swan River before he returns to England.

Some of these shipments are being sacked and kept separate from the balance of the grain shipped, so that a detailed report can be given as to their suitability for malting purposes.

Sound Rule For Driving

If Driver "Watches Other Fellow" Safety Is Assured

One of the sound rules for safe driving is to "watch the other fellow." When we form the habit of doing just that we keep our eyes on the road ahead. When we keep our eyes on the road ahead it's ever so much easier to keep our minds on the all-important job of driving safely. Watching the other fellow develops a new interest in him, too. It fosters a badly needed highway courtesy. It is a constant reminder that the road is owned by all, and not by any one driver. It tells us that the other fellow has equal rights with our own, and that if we infringe on these rights we do so at our own peril.—Brandon Sun.

Learn English By Singing

English is being taught Germans of Bavaria through singing. The Bavarian Broadcasting Company is broadcasting simple folk songs in English, the teacher at the microphone singing slowly and asking listeners to repeat the song after him. Every word is then explained by rhyme or song. He is assisted by a sextette. The system of instruction was originated by a Bavarian schoolmaster, imported from China, who says it was successful there.

A movie man in Hollywood has had the same valed for eight years and the same chauffeur fourteen, but not the same wife.

Plays Under a Handicap

Football Star Although Deaf Gets Signs By Finger System

Football signals given in sign language is something new for the gridiron.

But that is the way Bilbo Monaghan, big blonde, deaf and dumb right end of the Memphis Tigers, professional football team, learns what the next play is to be.

He lost his hearing when he was seven. He can talk, but his voice has the unnatural sound peculiar to deaf persons. To hear Bilbo tell it, deafness is a great help.

"I don't waste my breath talking," he explains. "And I believe I can see more than most players. My eyes are my ears, also, so they are well developed."

And another thing, when opposing players get to whispering about plays, Monaghan can sometimes read their lips.

Bilbo attended the school for the deaf and dumb at Jackson, Miss., where he starred in athletics. He then went to Gallaudet College, Washington, D.C., where he was a four-letter man.

This is his first season as a professional athlete.

"Frosty" Peters, quarterback on the Tigers and former University of Illinois football star, is Bilbo's buddy. "Frosty" gives him the signals in sign language and takes a special interest to see that Monaghan understands what he is taking next.

Bilbo can't hear the referee's whistle of course, so he takes no chances. "I always hold the guy till I'm sure," he says. "Most of the times I know when the whistle has blown, though, by seeing the other players stop."

One Reason Whaling Trade Has Declined

Sale Of Articles Containing Spermaceti Has Fallen Off

One of the reasons for curtailment of whaling operations off the Pacific coast during the last two seasons is that women are showing preference for articles that do not contain spermaceti, once a treasured article of world trade.

This is the opinion of William Schupp, president of Consolidated Whaling Corporation, which operates the only fleet of whaling vessels out of British Columbia ports. Spermaceti is the wax found in the head cavities and blubber of the sperm whale and this product was once used almost exclusively in the manufacture of women's face creams and other cosmetics. The substance is also used for making candles of standard photometric value, in the dressing of fabrics, in medicines and surgery, and especially in cerates, ointments and in cosmetic preparations.

Whatever the reason, the market for spermaceti and sperm oil is now very low. The north Pacific has the largest sperm whales in the world, according to Mr. Schupp. From 50 to 60 per cent. of the world's supply of spermaceti comes from the Queen Charlotte Islands.

Wants To Trade Stamps

Boy Patient In Victoria Hospital Writes To King George

Little Robert Guay, who is a cot patient in the Queen Alexandra Sanatorium, not far from Victoria, B.C., wants King George to swap stamps with him.

Bobby is starting a collection and he has some extra stamps he wants to exchange. He heard the other day that King George has one of the best collections in the world and decided to put him on his list. So he wrote the following letter:

"Dear King George V: I am sending you these stamps to see if you would like to swap some of yours for them."

"The Solarium is a nice place and it is facing the sea. I have a bad hip. I have been here quite a while. Junior is in the next bed to me. He has a bad back. We are getting better. I hope you are fine."

"I hope you will like the stamps. If you have them already you can trade them for some others."

"With good wishes, yours truly, 'Robert Guay.'"

Bobby is quite confident that the King will reply. He thinks it quite natural that he should write to His Majesty.

Gambia, West Africa, has established a finger print department with the local handmaster in charge as a sideline.

Customer: "So this is your last house?"

Estate Agent: "Yes; last if not leased."

Untouchables Live Lower Than Beasts

Caste Lines Have Been Maintained In India Thousands Of Years

There are four sharply divided Hindu castes and each of these is split into hundreds of sects, equally sharply divided. For thousands of years, through countless generations, these caste lines have been maintained in all their rigidity.

First come the proud Brahmins, or "sacredly gods," whose priests have a monopoly in the Hindu temples.

Second are the Kshatriyas, or fighting men.

Third are the Vaishyas, or tillers of the soil. (Gandhi was born into this caste.)

Fourth are the Sudras, or servants.

Beneath all these come India's 60,000 "untouchables," lowest of the low. They are doomed by Hindu law, to the chains of mental and spiritual slavery for life, and so are their children for all time to come.

For no "untouchable" or his children may ever rise above his lowly station. His only hope is in reincarnation, that he may be born into a higher caste when he next appears on earth. This he asks in his prayers. Crushed and beaten by centuries of oppression and discrimination, many of these 60,000 outcasts live lower than the beasts of the field. Some of them live on carrion, or on rats and snakes. When they seek jobs they are permitted to hold only such low positions as scavengers, sewer cleaners, street sweepers.

If a high-caste Brahmin mentions the name of an "untouchable" he must spit after doing so. If the latter's shadow should chance to fall upon him the Brahmin must undergo an elaborate "purification rite" conducted by the priests of the temple, so that he may be cleansed in body and soul.

If a shop-keeper of higher caste be murdered, enter the store. From some distance away, he shouts to the shop-keeper what he wants, places his few precious coins on the ground and then retreats. The shop-keeper comes out with the purchase, places it upon the ground, picks up the money.

These are the people for whom Gandhi went on his successful hunger strike. Not only did the wretched little prophet of India's new day seek to gain better recognition for them, but he also sought to smash the injustice practiced upon them by their own people by reason of the caste blight. Two hundred years before Christ, India's great King Asoka tried to do the same thing that Gandhi is trying to do in 1932. Asoka failed.

But whether it is to be done by Gandhi, Dehli or by Gandhi, the job of curing India's political and racial maladies is a tremendous one. Development and modernization is bound to be a gigantic task in a land that has slumbered through centuries with a philosophy of abnegation and humility which is epitomized in the Hindu proverb: "It is better to sit than to walk, to lie than to sit, to sleep than to wake, and death is best of all."

Treatment For Anaemia

Toronto Doctor Has Perfected New And Effective Syrup

Dr. G. H. W. Lucas, associate professor of pharmacy and pharmacology at the University of Toronto, is responsible for the preparation of a new and effective syrup for the treatment of anaemia.

The preparation has been tested with success by doctors not only upon themselves but upon patients.

The new preparation is said to be effective for those forms of anaemia requiring iron, which does not include pernicious anaemia.

The preparation will not be made by the university, it was stated, but the recipe will be available to physicians.

Frequent Lightning Flashes

During Four-Hour Storm In Germany 3,000 Officially Recorded

Within four hours 3,000 flashes of lightning were counted by an official photographic instrument during heavy thunderstorms in West Germany and the Dutch Frontier districts. The instrument was at Nordhorn, Westphalia. In one and one-half hours between 30 and 40 discharges a minute were registered. Observers say that during the four hours the sky was a sea of flames.

Certified Sen-Cooks

Every sea-going craft of 1,000 tons or over has to carry a certified sen-cook, by order of the Board of Trade. These men have to pass three grades before becoming proficient, when they can earn from £12 to £40 a month.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER
Author of
"The Splendid Police," "The Hermit
Of Far East,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXVII.—Continued

She was lying on her back in the shady wood whither they had ridden out to lunch that day, staring up at the b's of blue sky overhead which showed between the interlacing branches of the trees. The remainder of the party were grouped around her, reclining in various attitudes of a "dolce far niente" nature, while from a little distance away, where the horses were picketed in charge of a groom, came the drowsy, rhythmic sound of the munching of corn, punctuated by an occasional stamp of an impatient hoof.

"Yes, it's been good," agreed Lady Anne. "I shall never settle down again properly as a dowager at the Dower House!" and she laughed gleefully.

To her, it had been almost like a return to the days of her youth, for "her four children"—as she called them—had insisted on her sharing in all their active pursuits. And Lady Anne, who in her girlhood and early married life had been a first-class horsewoman and a magnificent swimmer, had consented "con amore."

Blaise pulled himself lazily up into a sitting posture and glanced towards the crimson glow of western sun where it struck athwart the tall trunks of the trees.

"You'll none of you live to go back to England. Instead, you'll be dying of pneumonia and a few other complaints—if I don't get a move on soon," he observed. "It's almost sunset, and after that it grows abominably chilly in this eastern paradise of Jean's. Besides, I fancy it's going to blow great gusts before long."

It was true. Already a little chill whisper of wind was shaking the tops of the trees, and before the party was fairly motioned away, the whisper had changed to a shrill whistling, heralding the big gale which drove along behind the innocent seeming breeze which at first had barely rocked the topmost branches.

It was a longish ride back to Belnafa, and the sun had dipped below the horizon in a sudden splendour of purple and red before the shoulder of the hill, upon the further side of which the castle stood, came into sight. Now and again the moon peered out between the racing, wind-driven clouds, clearly lining the bold black curve of the hill against a background of lowering sky.

For COLDS

"I always use BABY'S OWN TABLETS to break up my baby's cold," writes Mrs. Wilbert Colquhoun, Sturgeon Falls, Ont.
"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Greenhorn, Phillipsville, Ont.
Mothers everywhere report in like vein of the safe, sure results that follow the use of BABY'S OWN TABLETS in treating children's colds, teething troubles, simple fevers, disordered stomach, colic, constipation, 25 cents.

Jean and Blaise were riding abreast, a little in advance of the rest, engrossed by the difficulties of carrying on an animated conversation in a high wind. As they swung round the bend in the road which brought the hill's great shoulder into view, Jean threw back her head and stared at the sky above it with a puzzled frown on her face.

"Why . . . how queer!" she exclaimed. "The sun set nearly half an hour ago and yet there's still quite a brilliant red glow in the sky. Look, Blaise—just above where Belnafa stands."

Blaise glanced up casually in the direction indicated, then suddenly reined in his horse and half-rose in the stirrups, staring at the red glow deepening in the sky ahead.

"That's no sunset!" he exclaimed sharply. "It's—Great heavens, Jean! Belnafa is on fire!"

Even as he spoke a tongue of flame, mocking the dull glow with its gleaming blaze, shot up like a thin red knife into the sky and sank again.

A shout came from behind. "The others had seen it, also, and recognized its deadly import. The next moment the clatter of galloping hoofs echoed along the road as the whole party urged their horses on towards home as fast as they could cover the ground."

Soon they struck off from the road, taking a bridge path which slanted through the woods clothing the base of the hill, and as they emerged on to the broad plateau where Belnafa had stood sentinel through wind and weather for so many years, the whole extent of the catastrophe was revealed.

By this time the angry glow in the sky had turned dusk into day, while from the doors and windows of the castle fire vomited forth as from a furnace—upward in long, sinuous tongues of flame, licking the blackened walls, downward in spangled showers of sparks that drifted towards the earth like flights of golden butterflies.

Little groups of men and women, helpless as ants to stay the fire, rushed futilely hither and thither with hoes and axes, while on the smooth sward which fronted the castle lay piled enormous quantities of household stuff, a medley of fine old furniture, torn tapestry wrenched from its place against the walls, pictures, mirrors—anything and everything that could be dragged out into the open by eager hands and willing arms.

The major-domo, an elderly, grey-haired man who had been born and reared upon the estate and who had taken service with Glyn Peterson on the day when he had first brought Jacqueline, a bride, to Belnafa, caught sight of the riding-party returned and came hurrying to Jean's side.

The tears were running down his wrinkled face as he recounted the discovery of the fire, which must have started either just before or during the servants' dinner-hour, when few people, of course, were about the castle, and which had obtained a firm hold before it was detected.

The household staff, practised to a limited extent, a fire drill had been held once a month in Peterson's time—had done their best to cope with the flames, but vainly. The high wind which had arisen had thwarted their utmost efforts, and finally giving up all hope of saving the interior from being gutted, they had confined them-

selves to rescuing such valuables as could be easily removed.

There was the usual mystery as to how the fire had originated, and several circulated amongst the chattering throng which hurried hither and thither, momentarily augmented by the peasants who, at sight of the castle in flames, had come trooping up the hill from the village below.

The most likely story, and the one to which Blaise inclined to give most credence, was that the child of a woman who worked daily at the castle, escaping from its mother's care and launched on an independent voyage of discovery through the rooms, had knocked over a burning lamp. Then, terrified at the immediate consequences—the sudden flaring of some ancient tapestry, dry as tinder with the summer heat, near which the lamp had fallen—he had bolted away, out of the castle and so home, too scared to tell anyone of the accident.

But, as Jean commented mournfully, what did it matter how it happened? Except from the prosaic viewpoint of the fire insurance company, who would probably desire to know all kinds of details that it was impossible to supply!

For her, nothing mattered except that Belnafa, her home from childhood and the place where she and Blaise had proposed to spend a great part of their married life, was a furnace of flames.

It was a splendid but very terrible sight. The great grim walls of the castle stood four-square against the sky, charred and blackened but defiantly impervious to the flames that were licking covetously against the solid stone which fashioned them. Sentinel to the very end, they reared themselves unvanquished, guardians still, though all that they had sheltered through their centuries of watch and ward lay consumed within their very heart.

Jean, standing beside Blaise and watching the upward-tossing flames and the crimson banner of the lowering heavens, spoke suddenly:

"And the sky as red as blood above it! Blaise, the last of Keturah Stanley's prophecies has come true!"

An hour later help was forthcoming from the distant town to which a messenger had been dispatched post-haste, as soon as it was realized that the household staff, even with the assistance from the village, was hopelessly inadequate to cope with a fire of such magnitude. But it was already too late to accomplish very much in the way of salvage. All that remained possible was to quench the inferno of fire as soon as might be and so, perhaps, save some of the outbuildings.

Hour after hour through the night, human endeavour fought with the flames—subduing them again and again only to find them kindling into fresh life at the gusty bidding of the wind, leaping redly from the lambent heart of the conflagration, which glowed and pulsed and heaved like some living monster intent upon destruction.

It was not until dawn was breaking, that, with the dying down of the wind, the flickering crimson light an hour later, when the fire had been faded finally from the sky; and a half at last extinguished, the village folk, gathered about the scene of the catastrophe, had dispersed to their homes.

Lady Anne, accompanied by Nick

Quick
RELIEF
from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systematic pain; to men who must work on, in spite of eye-strain, fatigue or neuralgia.

Learn its quick relief for colds; for neuritis, rheumatism, lumbago. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

and Claire, started for the inn of the Green Dragon, whither the landlord had hurried on ahead to prepare temporary quarters for the now homeless little company from the castle. But Jean and Blaise still lingered by the deserted ruins left to say farewell to the place that had meant so much to them.

Beneath the misty aura of the summer morning sky, fanned by little hurricane zephyrs—rearguard of the hurricane which had passed—stood all that remained of Belnafa—blackened, naked walls, stark against that tender blue, brooding above the mass of cooling wreckage.

Jean's mouth quivered a little as her glance took in the scene of utter desolation.

"My House of Dreams," she whispered brokenly.

She was silent a few moments, her eyes embracing all that had once been Belnafa in a gaze which held both farewell and retrospect. And something more—some vision of the future. In the dawn-light peering the sky above she recognized the eternal promise of Him Who "commanded the light to shine out of darkness."

Her House of Dreams! The inner meaning of the song had grown suddenly clear to her.

When she turned again to Blaise, her expression was serene and tranquil. Touched with regret perhaps, but deeply confident.

"It don't think it matters, Blaise," she said simply. "Belnafa was only a symbol, after all. My House of Dreams-Come-True isn't built of stones and mortar. No one's is. It's just—where love is."

THE END

Little Help For This Week

"Where hast thou gleaned today?"—Ruth 2: 19.

What have I learned where'er I've been? From all I've heard, from all I've seen? What know I more that's worth the knowing? What have I done that's worth the doing? What have I sought that I should shun? What duties have I left undone?—Pythagoras.

All of this world will soon have passed away. But God will remain, and thou, whatever thou has become, good or bad. Thy deeds now are the seed-corn of eternity. Each single act in each single day, good or bad, is a portion of that seed. Each day adds some line making these more or less like Him, more or less capable of His love.—E. B. Pusey.

There is something very solemn in the thought that that part of our work which we have left undone may first be revealed to us at the end of a life filled up, as we had fondly hoped, with useful and necessary employments.—Passages From Home Life.

Answer Is "We Can"

County In Oregon Helping To Solve Relief Problem

Through the use of a portable cannery in Josephine County, Oregon, 100,000 cans of fruit and vegetables were filled either for immediate relief distribution or storage against future need. Now the cannery is again making the rounds, this time to put up meats of various kinds for the same purpose. So, to the question as to whether Josephine County can care for its unfortunate during the winter, the answer seems to be, "We can."

Why suffer needlessly! Douglas' Egyptian Liniment brings quick, sure relief to acid feet, stiff joints and aches. Relieves inflammation. Removes proud flesh.

For more than 100 years members of the family of Mrs. S. Halliwell, of Great Yarmouth, England, have been bench photographers.

The ancient Romans regarded silk as a sort of wool that grew on trees.

The Island Of Bali

Motion Picture Operators Made Costume Pictures Of Natives Buleleng, Bali.—The people here in general are considerably excited over the place being made for the island of Bali in the motion picture world. The arrival of another independent film group from New York has stirred up a lot of interest. One thing is sure, it is going to cost more from now on to make native costume pictures of the lovely girls who are making this island famous all over the world.

At last the women of Bali are becoming conscious of the fact that their beauty is of great value when reflected upon the silver screen. It might be of interest to state that the beauty of the Balinese women and girls has long been appreciated throughout Malaya. They are, in fact, "glorious, upstanding creatures with great masses of blue-black hair, a faint colour de rose diffusing itself through their skins of brown stain. They bear themselves with a quiet dignity and lissome grace."

A striking bit of decoration is added by the flame-colored flowers they wear in their dusky hair. Their eyes, instead of being oblique, as might be expected, are set straight in the head. It is admitted here that the chief charm in these island belles is found, not in their faces, but in their figures, which are slender and willowy.

Polygamy, grown expensive, is decreasing here. Also many wives mean many troubles. Twenty-five wives formerly constituted a large harem, although some of the high rulers possessed several hundred. Despite stories to the contrary, suttee—the burning of widows—has been discontinued in Bali. Formerly a young girl who married an elderly man incurred this risk of meeting an untimely and extremely unpleasant end. Nevertheless, some women who loved their husbands is still likely to join his dead body on the funeral pyre.

As few ships from Europe or America stop here the islanders are looking forward to the visit of the Cunard liner "Carinthia," which will stop here next March, on her voyage around the world via the Southern Hemisphere. The people here are hoping a number of camera men will disembark. Because of the failure of ships to call the people are free from the diseases brought by white men to many of the South Sea Islands. The population of Bali is generally healthy and constantly increasing. There are nearly a million natives in Bali and now the great majority of them are growing picture-minded.

Dominion Loan Approved By Financial Leaders

Montreal, Nov. 14.—Financial leaders in Canada are unanimous in approving the latest bond offering of the Dominion government as a good opportunity for the investor seeking a sound security and a reasonable yield. Since the announcement of the loan the general manager of every one of the chartered banks has issued a statement which, in a variety of ways, reflects the most conservative banking opinion, not only as to the loan itself, but as to the future trend of interest rates. Also, without exception, the banking opinion breathes a spirit of confidence in the future of the country.

Such other Canadian notables as E. W. Beatty, chairman and president of the Canadian Pacific Railway, and Professor Stephen Leacock have added their weight to the opinions of the leading professional bankers.

The Veterans Banquet At The Chinook Hotel

The banquet turned out a complete failure. Preparations had been made in the big banquet hall for 150 guests at a cost of \$12.00, and only \$31.50 was taken in at the door by our old friend, Mr. Berry, who volunteered as cashier.

The banquet started off with Reeve W. S. Warren as toastmaster for the evening. The first toast was to "The King," and all sang the National Anthem. The next toast was to "Our Fallen Comrades," one minute of silence was observed in respect to the heroic dead, after which the toast was responded to by Postmaster A. B. Hughes, of Cereal, singing the immortal poem, "In Flanders Field." The third toast was to "The Wives, Daughters, Sweethearts, Widows, Nurses and all Women Who Helped Their Country in the Great War, and Suffered Accordingly." Responded to by one who went over the top, and all joined in singing "Keep the Home Fires Burning. Fourth toast "The Commonwealth of Canada, and the Boys Who Went Over There." Responded to by Mr. Connor, and all sang "Over There." Fifth toast, "Our Gallant Allies, Including All Nations Who Fought on the Side of Right and Justice." Responded to by Captain Peters, who outlined Canada's prominent part in the World War, with a greater percentage of men than any other warring nation, and also spoke of the part taken by the United States. The guests followed in singing "My Country, 'Tis of Thee." Sixth toast, "Success of Disarmament Conference and End of All Wars." Responded to by Comrade Warren in a most scientific way, and all singing "Pack Up Your Troubles in Your Old Kit Bag." Seventh toast, "Prosperity the World Over, and Plenty for Every Living Soul." Responded to by a shipmate of the British navy, and all singing "Happy Days."

After the banquet, for which over 200 lbs. of turkey had been prepared, over 50 pies and a bushel of salad, all by the three Bruston sisters and Myrtle Peterson, Mr. Edward Kirkwood, F.T.C.M., took charge of the musical programme, with Mr. A. Z. Weber, from the Royal Bank in Cereal at the piano, and all joined in community singing. Before leaving I wish to thank

my many farmer friends and neighboring townspeople for their loyal financial support to the hotel, they surely stood by the hotel.

Yours with regret,
Captain C. O. Peters

Heard Around Town

The Ladies' Aid of the United Church will hold a bazaar and chicken supper, on Saturday Dec 3rd in the Banner Hardware. Supper; One price for all; 25 cents.

Mr. and Mrs. W. A. Todd and daughter were dinner guests Sunday evening at the home of Mr. and Mrs. R. J. Scott, Oyen.

We have a car of salt coming this week, and are offering it at special prices until Nov. 26th. Acadia Produce Company.

S. W. Warren left Tuesday for Calgary where he will attend the Convention of the Alberta Association of Municipal Districts. Mr. Warren was the delegate appointed by Col. Holmes Municipality.

Palmer's Limited (Heath & Co.) Ladies' Coats and Dresses, will be at Hurley's Store Wednesday morning ONLY, November 23rd.

The Ladies' Aid plan to put on a chicken supper after the bazaar on December 3rd, and would be very thankful to receive donations of chickens from out of town ladies. Will those ladies who are willing to donate kindly notify Mrs. Lee, president of the Aid, before Nov. 26th.

We have Overshoes, Felt Boots, Etc.: Men's Blizzards, \$1.20; Men's one buckle No. 1 Quality, \$1.70; Men's two buckle No. 1 Quality, \$2.40; Boys' two buckle No. 1 Quality, \$1.70. Also Heavy, All Wool Combinations \$2.35. And a full line of Mitts, Pullover Socks, etc. Compare our prices. Acadia Produce Company.

The Ladies' Card Club met at the home of Mrs. N. Murray. The first prize was won by Mrs. R. D. Vanhook and the consolation by Mrs. W. H. Butts.

Capt. C. O. Peters left Wednesday night for New York and other United States' points where he will spend a couple of months' holiday.

H. Gardiner, of the Rearville district, while lighting his lamp had what might have proven to be a very serious accident. There had been some gasoline on his sweater, and when he lit a match his sweater caught fire and Mr. Gardiner's face was badly burned. He is ble to be around and is on the way to recovery.

Mr. Scott, school inspector, of Oyen, visited the Laughlin school on Thursday forenoon and the Chinook consolidated school in the afternoon.

Edgar Barry, who has been in the Cereal hospital for the past month, returned to Chinook Thursday. We hope for him a speedy recovery.

For sale, milk cow and two calves, cheap for cash. Apply William Milligan, Chinook.

Heard at the Navy Crew Race.

Biddy—"I suppose you've been in the navy so long you are accustomed to sea legs?"
Middy—"Lady, I wasn't even looking."

Service and Quality Our Motto

School Boy Howlers

A monastery is a place for monks.

Marriage is a sacrament where a priest unites a man and woman in fatal union.

False doctrine is when a doctor gives wrong stuff to a man.

An appendix is a portion of a book which nobody yet has discovered of any use.

A casserole is a garment worn by curates.

An incubus is a thing that hatches chickens.

Immortality is running away with another man's wife.

The children of an Archdeacon are called Archdeacons.

Discomposed is how you look after you have been dead a long time.

Dimples are dents on girls' faces like pimples inside out.

Met His Match.

"I hear you've lost your parrot that used to swear so terribly."

"Yes, poor dear, we found him dead on the golf links."

GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

APPLICATION FOR BEER LICENSE

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass or open bottle, for consumption in conformity with the provisions of the Government Liquor Act of Alberta, and regulations made thereunder, with respect to the following premises: The north east corner of the Chinook Hotel, situated on Lots One (1) and Two (2), Block Four (4), Plan 2231, B.A., Village of Chinook, Alberta.

Dated at Chinook, Alberta, this 17th day of November, 1932.
Gustav Cook, applicant.

Send us your news items—we are always glad to receive them.

BEER IS GOOD FOR YOU

The following statement was made by Sir Thomas Horder, physician to the Prince of Wales, at a public dinner gathering, held April 15th, in London, England:

"The willing and happy worker will get more work done and do it better than the unwilling and discontented worker. It is in this direction that alcoholic beverages like beer make their great contribution to economic efficiency."

"Appetite is a function of the brain as much or even more than of the stomach, and its importance in the physiology of digestion and nutrition is very great. It is stimulated by a moderate use of such a beverage as beer, and at the same time rest is given to life which results in larger and richer activities."

The beer brewed in Alberta contains every element and quality that Sir Thomas Horder would expect to find in the wholesome beverages of malt and hops he so strongly advocates.
